### about the artist

jens magnusson

Jens Magnusson is an illustrator and graphic designer living in Stockholm, Sweden. Born in 1972 and working professionally since 1999, his clients ranges from advertising agencies to museums to children's book publishers. When it comes to making illustrations, he prefers to work by hand rather than directly with the computer, as he likes scissors, brushes, and paper more than the computer mouse, though ironically he ends up spending most of his time in front of the computer anyway.
